## Correct choice of Directional Control Valves for Bloom Winches

Winches require a **Motor Spool Control Valve**.  
That is the valve's work ports are **open** to tank in neutral position.

\*Winches require ridged mounting plate.  
See owner's manual for information about proper mounting  
plate thickness or call Bloom Sales Engineer at factory

### **WARNING!**

Goods are not intended for use in the moving or lifting of  
persons!

The winches described herein are neither designed nor intended  
for use or application to equipment used in the lifting or moving of  
persons and it is understood that all such use shall be at the sole  
risk of the user.

The cable clamps on winches are not designed to hold rated  
loads. A minimum of 5 wraps of cable must be left on drum barrel  
to guarantee holding of rated load.

Applications of winch where life would be endangered by any  
event are not recommended.
