

BLOOM™ WINCH

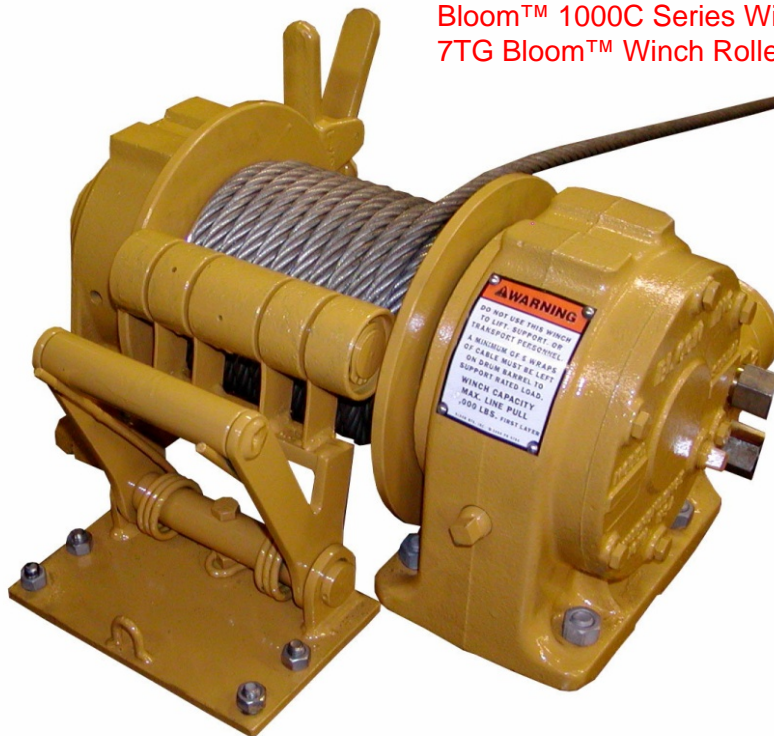

WINCH ROLLER CABLE TENSIONERS

*"Quality
Since 1910"*

The rugged Bloom™ Winch Roller Cable Tensioners help keep the cable on the drum by eliminating slack conditions. Without the tensioner, wire rope cable can balloon off winch drum during slack conditions. Winch Roller Cable Tensioners apply pressure to cable on winch drum which causes the cable to wind smoothly and evenly. Winch Roller Cable Tensioners promote longer cable life by reducing common spooling problems such as bird-nesting, cable kinks and cable flat spots.

Bloom™ 1000C Series Winch Shown With
7TG Bloom™ Winch Roller Cable Tensioner

Bloom™ Winch Roller Cable Tensioners are built with a strong steel frame. Tension is maintained through the use of heavy duty coil springs. Each steel roller is manufactured with a relubeable bronze bushing inside, to keep tensioner rolling smoothly. Tensioners are available in standard sizes for Bloom™ Winches and they are available in custom sizes upon request.
