

Series LS10K Galv HYDRAULIC CABLE WINCHES

Lift-Safe® hydraulic winches are specifically designed for lifting applications and optimum load control. Engineered for enhanced safety with redundant braking systems, and available in a variety of configurations. Lift-Safe® winches utilize the DUET-SAFE® Double Action Braking System to provide both static and dynamic braking. Lift-Safe® winches offer increased operational flexibility, and superior load control in lifting applications. Series LS10K Galv direct drive can be used on small cranes, rear load waste packers, drill rigs, fishing boats, marine craft, construction booms, mining and logging operations.

UP TO 12,000 POUNDS CAPACITY

<u>Lift-Safe® Hydraulic Cable Winches – Standard Features</u>

BRAKE - **DUET-SAFE® Double Action Braking System** combines a powerful spring

applied, hydraulic released brake with a double counter balance brake valve to automatically hold loads when hydraulic pressure is released and control speed during lowering operations. Winch is ideal for high speed lifting and pulling applications or

wherever load holding is critical.

GEAR CASE - Made of high strength cast iron. Completely sealed for oil enclosed operation and to

keep dirt out.

WORM SHAFT - One piece alloy steel hardened and ground for extra durability. Compact design allows

hydraulic motor to be coupled directly to worm.

WORM GEAR - High tensile aluminum-nickel alloy bronze. Optimum lead and pressure angles transmit

maximum power to the drum.

GEAR RATIO - 20:1 standard, 10:1, 27:1, 40:1 optional ratios provide optimum efficiency in power and

speed.

BEARINGS - Worm gear and worm shaft run on tapered roller bearings. Outer end housing has

sealed ball bearing.

DRUM SHAFT - 1-1/2" diameter heat-treated alloy steel minimum tensile strength 150,000 psi.

CABLE DRUM - Tough all steel construction resists breakage or warping.

Correct choice of Directional Control Valves for Lift-Safe® Winches

All Lift-Safe® Winches require a Motor Spool Control Valve.

That is the valve's work ports are **open** to tank in neutral position.

*Winches require ridged mounting plate.

See owner's manual for information about proper mounting plate thickness or call Bloom Sales Engineer at factory

WARNING!

Goods are not intended for use in the moving or lifting of persons!

The winches described herein are neither designed nor intended for use or application to equipment used in the lifting or moving of persons and it is understood that all such use shall be at the sole risk of the user.

The cable clamps on winches are not designed to hold rated loads. A minimum of 5 wraps of cable must be left on drum barrel to guarantee holding of rated load.

Applications of winch where life would be endangered by any event are not recommended.
