BLOOM[™] WINCH

Hydraulic Speed Reducer

"Quality Since 1910"

The rugged construction and versatility of the Series 1100K Speed Reducer is ideal for stationary and mobile applications where slow speed, high torque, or variable speed and reversing are needed. Applications include paving and curb forming, ditching, irrigation, and plastic and extruding equipment.

BloomTM Hydraulic Speed Reducers – Standard Features

GEAR CASE

- Made of high strength cast iron. Completely sealed for oil enclosed operation and to keep dirt out.

WORM SHAFT

- One piece alloy steel hardened and ground to insure long service. The hydraulic motor couples direct to the shaft.

Up To 24,000

WORM GEAR

- High tensile aluminum-nickel alloy bronze . Optimum lead and pressure angles transmit maximum power to the drum.

GEAR RATIO

- 20:1 standard, optional 10:1, 27:1 and 40:1 ratios provide optimum efficiency in power and speed.

BEARINGS

- Worm gear and worm shaft run on tapered roller bearings in an oil enclosed gear case.

OUTPUT SHAFT

- 1-1/2" diameter heat -treated alloy steel minimum tensile strength 150,000 psi.

MOTOR MOUNT

- SAE (A) 2 bolt flange.

BRAKE

- Spring applied hydraulic release brake automatically holds load when hydraulic pressure is released.

Correct choice of Directional Control Valves for Bloom Winches

Motor Spool Valve – Work Ports are **open** to tank in neutral position. Use on all winches that use Counter Balance Valves to hold load.

*Winches require ridged mounting plate.

See owner's manual for information about proper mounting plate thickness or call Bloom Sales Engineer at factory.

WARNING!

Goods are not intended for use in the moving or lifting of persons!

The winches described herein are neither designed nor intended for use or application to equipment used in the lifting or moving of persons and it is understood that all such use shall be at the sole risk of the user.

The cable clamps on winches are not designed to hold rated loads. A minimum of 5 wraps of cable must be left on drum barrel to guarantee holding of rated load.

Applications of winch where life would be endangered by any event are not recommended.
