

BLOOM™ WINCH

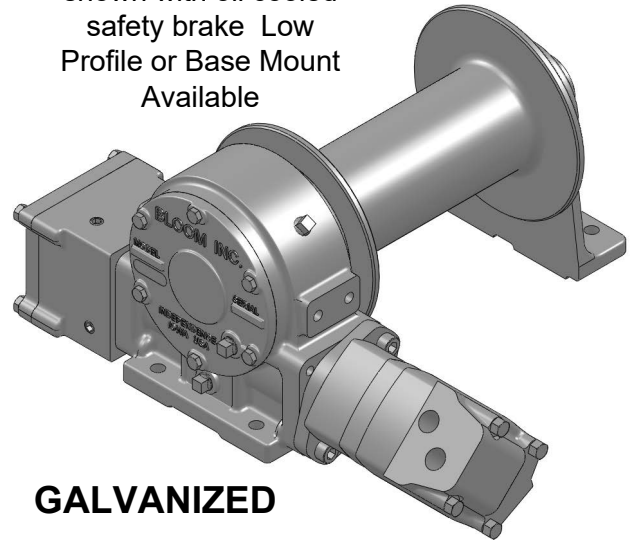

Series 1200 Galv & Series 1200C Galv

HYDRAULIC CABLE WINCHES

The rugged construction and versatility of the **Series 1200 Galv** and **Series 1200C Galv** make it adaptable to a wide range of applications. **Series 1200 Galv** direct drive winches are used for industrial pulling and hoisting applications, fishing boats, marine craft, drill rigs, small cranes, factory material handling and rear load waste handlers. **Series 1200C Galv** winches are equipped with a sliding clutch to allow free-spooling of the drum for pulling and dragging applications including factory material handling, mining and logging equipment, flat bed trailers, air freight pullers, off the road tractors and rear of cab and front mounting on ½ to 1½ ton trucks. Both **Series 1200 Galv** and **Series 1200C Galv** are available with a oil cooled adjustable automatic safety brake in a variety of motor displacements.

Bloom™ Hydraulic Cable Winches – Standard Features

- | | |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| GEAR CASE | - Made of high strength cast iron. Completely sealed for oil enclosed operation and to keep dirt out. |
| WORM SHAFT | - One piece alloy steel hardened and ground for extra durability. |
| WORM GEAR | - High tensile aluminum-nickel alloy bronze. Optimum lead and pressure angles transmit maximum power to the drum. |
| GEAR RATIO | - 20:1 standard, 27:1 and 40:1 optional ratios provide optimum efficiency in power and speed. |
| BEARINGS | - Worm gear and worm shaft run on tapered roller bearings. Outer end housing has a sealed ball bearing. |
| DRUM SHAFT | - 1-1/2" diameter heat -treated alloy steel minimum tensile strength 150,000 psi. |
| CABLE DRUM | - Tough all steel construction resists breakage or warping. |
| CLUTCH OPTION | - Series 1200C Galv winches comes equipped with heat-treated dog type clutch to provide free-spooling of the winch drum. Positive lock-in and lock-out. |
| BRAKE OPTION | - Oil cooled automatic safety brake disengages when a load is lifted and automatically engages when power is removed or the load is lowered. |

BLOOM™ WINCH

Correct choice of Directional Control Valves for Bloom Winches

Tandem Center Spool Valve – Work Ports are **blocked** in neutral position

Use on all winches that use motor only to hold load.

*Winches require ridged mounting plate.
See owner's manual for information about proper mounting plate thickness or call Bloom Sales Engineer at factory

WARNING!

Goods are not intended for use in the moving or lifting of persons!

The winches described herein are neither designed nor intended for use or application to equipment used in the lifting or moving of persons and it is understood that all such use shall be at the sole risk of the user.

The cable clamps on winches are not designed to hold rated loads. A minimum of 5 wraps of cable must be left on drum barrel to guarantee holding of rated load.

Applications of winch where life would be endangered by any event are not recommended.
